

Qwest Availability Statement List (BMG)
Effective Date 09/14/09

N11 Dialing Service: N11 Dialing Service is available only in the states of AZ, CO, ID, IA, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY.

911 Services Qwest® 911 services are available in AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY.

Analog Trunks: Analog Private Branch Exchange service is not provided on a one-way calling basis. Therefore, the customer must choose a combination of in-only, out-only or two-way trunks to meet their calling needs. Analog PBX trunks are available in all central offices in the Qwest® local service territory.

Anti-Virus/Anti-Spam: Qwest® Anti-Virus/Anti-Spam service is available in the U.S. and many international locations. Customer must verify with Qwest the availability of the Service in Customer's desired international locations. Minimum one-year commitment required. An Internet connection through an Internet service provider is required and may be acquired from Qwest or another provider of your choice. Qwest cannot guarantee all spam, viruses or offensive e-mails will be filtered.

Asynchronous Transfer Mode (ATM) Service Domestic: Qwest Communications Company, LLC domestic ATM service is directly connected to the Qwest® fiber network in the United States. Service may require CPE purchase and minimum term of commitment.

Business Protection Services: Qwest Business Protection Services (BPS) is available to Qwest business customers in the domestic United States. Refer to availability statements on individual products to be deployed for specific Qwest BPS solutions.

Business Protection Services—Disaster Recovery: Business Protection Services—Disaster Recovery consists of three offerings. Availability varies, per offering. Your Qwest sales representative will keep you apprised of where the individual offerings are available. A contract is required. In addition to monthly recurring charges, other charges may apply. Additional restrictions may apply.

Business Voice Messaging Service (BVMS): Qwest Corporation Business Voice Messaging Service (BVMS) is available in the Qwest® local service territory of AZ, CO, ID, IA, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY for business customers.

Centrex 21: Availability of Centrex 21 for new sales will expire on April 10, 2005. Beginning on April 11, 2005, all new basic exchange sales must be from a non-grandparented product, such as: 1FBs, Qwest Choice® Business, Qwest Choice® Business Plus and Qwest Choice® Add-A-Line.

Centrex Management System (CMS): Centrex Management System (CMS) is generally available in 1AESS, 5ESS, and DMS-100 central offices where facilities permit. CMS is not available in the Ericsson (AXE), DMS 10, 2B, NEC (Eastern only), or 3ESS. Qwest cannot provide interLATA long-distance service originating, interLATA 8XX service terminating; or interLATA private line or data circuits with either end in the states of AZ, CO, ID, IA, MN, MT, NE, NM, ND, OR, SD, UT, WA, and WY.

Centrex Prime: Qwest Corporation Centrex Prime is a software-based service that interacts directly with the telephone system. Available to business customers within Qwest's local service territory of AZ, CO, IA, Southern ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY where the central offices have compatible switch types. Availability of features and facilities depends on central office equipment and software programs. Contract termination charge may apply. Other restrictions and limitations may apply. Contact your Qwest representative for more details.

CO/ACD: Qwest Corporation CO/ACD is available, where tariffed in Qwest's local service territory, from DMS-100 central offices, and from three 5ESS central offices where Meridian ACD servers are in place (Minneapolis Downtown, St. Paul Market Street and Phoenix North).

Conferencing: Qwest® Conferencing is available to customers in North America and certain European, Australian, New Zealand and Asian locations. For specific international locations, please refer to the table located at: <http://conferencing.qwest.com/international/index.htm>. End users can access the service from anywhere in the world, as long as they have a telephone. In the case of Web Conferencing, a computer and Internet access are necessary. Direct dial calls will be carried by your long-distance provider.

CPE: Qwest General CPE Solutions: Qwest® CPE Solutions are available to business customers throughout the United States and consist of products from Cisco®, Nortel® and other manufacturers and services. Refer to Qwest® Select Advantage™ for specific terms and conditions including ProMET™ service level agreements, if any. Access to the Internet or the PSTN may be required to complete the solution. IP Telephony requires quality of service (QoS) to ensure clear conversations. Best effort networks such as the Internet does not, and your network may not, support QoS. Qwest® VoIP Readiness Service will validate QoS. Access to 911/E911 for remote or mobile VoIP users is subject to availability and the terms and conditions of the agreement for VoIP services. Prices vary depending on CPE Solution selected. All trademarks are the property of their respective companies.

CPE Enterprise Networking: Qwest® CPE Solutions consists of Cisco®, Nortel® and other manufacturer's products and Qwest services available in select locations nationwide. Refer to Qwest® Select Advantage™ for specific terms and conditions for Qwest® CPE Solutions including ProMET™ service level agreement offerings. Access to the Internet or the PSTN may be required to complete the Solution. IP Telephony requires quality of service (QoS) to ensure clear conversations. Best effort networks such as the Internet does not, and your network may not support QoS. Qwest VoIP Readiness Service will validate QoS. Access to 911/E911 for remote or mobile VoIP users is subject to availability and the terms and conditions of the agreement for VoIP services. All trademarks are property of their respective companies.

CPE: Qwest Data CPE Solution: Qwest® CPE Solutions for Enterprise Networking are available to business customers throughout the United States and consist of products from ADTRAN®, Cisco®, Juniper Networks and Nortel® and services. Refer to Qwest® Select Advantage™ for specific terms and conditions for Qwest® CPE Solutions including ProMET™ Service Level Agreements, if any. Prices vary depending on CPE Solution selected. All trademarks are the property of their respective companies.

CPE: Qwest ProMET™ Services CPE Solution: Qwest® ProMET™ services are available to business customers throughout the United States. Refer to Qwest® Select Advantage™ for specific terms and conditions including Qwest® ProMET™ Service Level Agreements. Prices vary depending on CPE Solution selected. All trademarks are the property of their respective companies.

CPE: Qwest Voice and IP Telephony CPE Solution: Qwest® CPE Solutions for IP Telephony are available to business customers throughout the United States and consist of products from Cisco® and Nortel® and services. Refer to Qwest® Select Advantage™ for specific terms and conditions for Qwest® CPE Solutions including ProMET™ Service Level Agreements. Access to the Internet or the PSTN is required to complete the Solution. IP Telephony requires Quality of Service (QoS) to ensure clear conversations. Best effort networks such as the Internet does not, and your network may not, support QoS. Qwest® VoIP Readiness Service will validate QoS. Access to 911/E911 for remote or mobile VoIP users is subject to availability and the terms and conditions of the agreement for VoIP services. Prices vary depending on CPE Solution selected. All trademarks are the property of their respective companies.

CPE: Rental CPE: Rental CPE is available throughout the U.S. and must be ordered in conjunction with either domestic Qwest iQ® Networking Service, Qwest iQ® Analog and Digital VoIP, Qwest iQ® Integrated Access Package, Qwest iQ Unify™ Bundle, Qwest iQ® Managed VoIP, or Qwest iQ® Managed VoIP Bundle Services.

DDoS Mitigation. Qwest iQ™ DDoS Mitigation service is available throughout the 48 contiguous United States and Hawaii, and is only available if the customer's traffic terminates on a domestic Qwest iQ® Networking Internet Port. Term commitment required. Restrictions and limitations may apply. Please call your sales representative for complete details.

Digital Switched Services (DSS): Qwest Corporation Digital Switched Service (DSS) is available only in the Qwest local service territory of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY. A minimum term of commitment is required. Specific CPE is required and may be purchased through Qwest or a third-party vendor.

Direct Inward Dialing (DID): Direct Inward Dialing (DID) may be provided where central office facilities are available and the PBX system or customer-provided switching equipment capabilities permit. DID is available in all central offices.

Directory Assistance: Qwest® Large Business Directory Assistance is available nationwide to most Qwest business customers. Minimum one-year term of commitment, one-time setup fee and minimum 55,000 call-per-month volume required. Call defined as call completion to Directory Assistance representative. Pricing determined by commitment level.

Domestic Network Diversity Service: Domestic Network Diversity Service® is an optional routing enhancement for the following services: Asynchronous Transfer Mode (ATM), Dedicated Domestic Outbound/Inbound Long Distance, Domestic Frame Relay, Domestic Private Line, Qwest iQ® Networking, Local Access, Ethernet Private Line, and QWave®. Availability depends on underlying services selected and is not available outside the continental U.S. Recurring fees for diversity service vary depending on speed selected. Other restrictions and limitations may apply. Complete terms provided in service exhibit. Service provided by Qwest Communications Company, LLC.

Ethernet Private Line Domestic: Qwest Communications Company, LLC Domestic Ethernet Private Line service is available to Qwest® business customers in the contiguous U.S. states, subject to availability of facilities. Synchronous optical network (SONET) equipment needed to terminate circuits. Only on-net Ethernet Private Line circuits are offered today because of proprietary Ethernet mapping protocol requirements. Installation, expedite, Ethernet local access and extended wiring charges may apply.

EZ Route: Qwest® EZ Route feature is available for Qwest Toll-Free and Qwest Hosted IVR customers for calls originating anywhere in the continental U.S., Alaska, Hawaii, Puerto Rico, Guam, the U.S. Virgin Islands and Canada, with switched and dedicated termination anywhere in the contiguous U.S. and switched termination to Alaska, Hawaii and Puerto Rico. Installation and other nonrecurring charges and monthly recurring charges apply. Additional local loop equipment may be required.

Frame Relay Domestic: Qwest Communications Company, LLC Domestic Frame Relay Service is directly connected to the Qwest® fiber network in the United States. Service may require CPE purchase and minimum term of commitment.

GeoMax Service: Qwest Corporation GeoMax® service is a high bandwidth Private Line Solution (PLS) available on an individual case basis (ICB) in the Qwest local service territory of AZ, CO, IA, ID, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY. Distance limitations,

specific hardware, software and configuration requirements apply. Minimum three-year term of commitment required. Termination liability applies

High-Speed Internet: Qwest High-Speed Internet® (formerly called Qwest DSL®) services are available for Qwest® customers in Qwest's local service territory of AZ, CO, ID, IA, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY where Qwest has High-Speed Internet-equipped facilities and where the customer's line qualifies. These customers have the option of choosing from Qwest-provided Internet access service, over 400 other ISPs or their Corporate High-Speed Internet Host for their connection to the Internet. Speed varies depending on service location, phone line qualifications, computer performance/configuration, network/Internet congestion and other factors. Uninterrupted or error-free service not guaranteed. Telephone line installation, non-standard High-Speed Internet installation, network configuration and activation are additional charges. Certain restrictions and limitations apply.

Hosted IVR: Qwest® Hosted IVR service is available for call centers located throughout the United States. Hosted IVR is designed to operate on both Qwest and non-Qwest networks. Qwest will meet the customer's business requirements by working with the chosen carrier to terminate calls to affected call centers.

Hosting: Dedicated: Dedicated Hosting Collocation Service is the use of a secure hosting space with reliable network connectivity in a Qwest CyberCenter, and does not include Qwest's collocation offering used for telecommunications services which is available to customers under separate agreement. Contract required. Additional charges may apply for services not covered under the service description. Additional equipment may be required. CyberCenter features may vary. Service is available throughout the domestic U.S. Qwest CyberCenter facilities are located in select cities throughout the U.S.

Hosting: Managed Hosting Service: Qwest® Managed Hosting Service is available to customers anywhere in the world and provides world-class managed hosting operations 24/7. Following a detailed analysis, a comprehensive support model is designed and executed to meet the customer's specific needs. The result gives customers the time they need to focus on their business while Qwest focuses on managing their hosting services.

Hosting: Storage Service: Storage service is available to customers who purchase Qwest Dedicated Collocation Hosting Service or Qwest Managed Hosting Service. A contract is required. In addition to monthly recurring charges, other charges may apply. Additional restrictions may apply.

Integrated Management: Qwest® Integrated Management is available to business customers throughout the U.S. and internationally. Minimum one year term of commitment required. Early termination fee may apply. Price varies depending on plan selected and number of devices covered. Listed prices do not include taxes, surcharges and other fees.

Intelligent Pre-Route (IPR): Intelligent Pre-Route (IPR™) is a network-hosted pre-route application that is available from Qwest Communications Company, LLC to business customers nationwide wherever Qwest® Toll Free Service is offered. Nonrecurring charges and monthly recurring charges apply. Customer must provide the Cisco® ICM equipment. Feature and billing limitations apply.

International Data & IP: Qwest® International Data & IP products are available in over 60 countries and six continents worldwide. Qwest Data & IP services are carried over the Qwest-owned facilities-based network in the United States and in three large business centers in Asia (Hong Kong, Japan and Singapore). Availability to the rest of the globe is provided by Qwest Global Connect partners. Qwest Global Connect partners are world-class third-party service providers. Qwest partners with global and regional partners to provide domestic customers with worldwide reach. All of the Qwest Global Connect partners are selected only after a rigorous evaluation process that ensures only the most financially, technically and customer supported systems qualified partners are selected for the Global Connect partnership program.

Intrusion Detection Service: Intrusion Detection Service is available anywhere in the United States. Minimum one-year commitment required. An Internet connection through an ISP and an Ethernet connection are required and may be acquired from Qwest or another provider of your choice. Set-up fee applies.

IP Centrex Prime™: IP Centrex Prime™, an optional feature of Centrex Prime, is available to business customers in the states of MN, UT, and WA, where facilities permit. Monthly recurring charges will apply. Compatible equipment required. Other restrictions may apply.

IP Long Distance (Domestic and International): Qwest® IP Long Distance (Domestic) service is available and may be originated from anywhere in the contiguous U.S. and Hawaii. Calls may be terminated throughout the United States and in some U.S. territories. Qwest IP Long Distance (International) service is available and may be originated from anywhere in the contiguous U.S., to many locations internationally. For International, mobile terminations are available in a majority of the destinations (see pricing sheet for availability and pricing). International calls may not originate and terminate within the same country. Neither Domestic nor International support local services, 911, E911, V911, operator services, local number portability, or directory listings. An Internet connection is required. Other restrictions and limitations may apply.

IP Toll Free (Domestic and International): Qwest® IP Domestic Toll Free service is available for origination from anywhere in the U.S., including Alaska and Hawaii, and some U.S. territories, with termination anywhere in the contiguous U.S. Qwest IP International Toll Free service allows customers to originate toll free calls from an international destination, including Canada, and terminate to all contiguous U.S. states. With IP International Toll Free, calls may not originate and terminate within the same country. IP International Toll Free calls may terminate in Alaska, Hawaii, and some U.S. territories, if special pricing approval is granted by Qwest. An Internet connection is required. Other restrictions and limitations may apply.

ISDN: ISDN service is not available in all areas, depending on distance from an ISDN-equipped service office and technical phone line qualifications. Additional charges for backhaul, ISDN modem and RJ45 jack may apply. Not all Internet Service Providers (ISPs) are compatible with ISDN. Some ISPs may charge more for Internet access over ISDN. Actual speeds may vary.

ISDN Primary Rate Service: Qwest Corporation ISDN Primary Rate Service (PRS): Minimum term of commitment required. Most Qwest central offices in the Qwest local service territory of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY are equipped to provide ISDN. Availability also depends on the customer's distance from the central office and technical line qualifications to customer's location. Internet Access provider costs may be additional.

ISDN Single Line Service (SLS): Qwest Corporation ISDN SLS is only available in the Qwest local service territory of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA, and WY. Most Qwest central offices are equipped to provide ISDN. Availability also depends on the customer's distance from the central office and other technical line qualifications. Line installation fee applies. In other areas, ISDN service can be backhauled from a host-equipped switch at an additional charge. ISDN CPE and Internet access provider costs additional, if necessary. SLS can be purchased on a month-to-month or contractual basis. Some restrictions may apply.

LAN Switching Service (LSS): Qwest Corporation LSS is available at locations in the Qwest® local service territory of AZ, CO, ID, IA, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY where Qwest ATM network service points are deployed. A switch and IOF capacity check must be conducted via Qwest AQC process to determine the service availability.

Large Business Directory Assistance: Qwest Large Business Directory Assistance is available nationwide to most Qwest business customers. Minimum one-year term of commitment, one-time setup fee and minimum 55,000 call-per-month volume required. Call defined as call completion to Directory Assistance representative. Pricing determined by commitment level.

Local Access: Local Access is available to Qwest® business customers throughout the U.S. Local Access reverse multiplexing is not available in Alaska and Hawaii.

Managed Applications: This suite of hosted and premise-based applications includes messaging, file sharing, collaboration, Web services and e-commerce. Recurring charges vary, depending on the services ordered. In addition to monthly recurring charges, additional charges may apply for services not covered under the service descriptions. Available to business customers throughout the domestic U.S. An Internet connection through an Internet service provider is required, and may be acquired from Qwest or another provider of your choice. A contract is required. Additional restrictions and availability requirements may apply.

Managed Firewall VPN: Managed Firewall VPN is a managed CPE solution that is available in many locations in the world. Call your sales representative for complete details. Customer is responsible for obtaining Internet connectivity in association with this service. Minimum term of commitment required. Additional equipment may be required. Set-up fee applies. Additional restrictions may apply.”

Managed IP Communications: Qwest® Managed IP Communications is available to business customers throughout the U.S. and internationally. Monthly charge varies depending on options selected. Network assessment fee applies. Due to limitations on Qwest ability to sell CPE outside the U.S., The **Bundled MIPC** solution (including software, hardware, monitoring and management) is available only in the domestic U.S. The **Managed-Only IPC** solution (network assessment, 24/7 monitoring and incident management, reporting, secure VoIP operations, maintenance and change management and proactive QoS management) is available domestically and internationally. Internet and PSTN connectivity are not included with the service but may be provided by Qwest or customer-provided. Other restrictions may apply.

Metro Ethernet Private Line: Qwest Communications Company, LLC Metro Ethernet Private Line is a stand-alone service available in SONET metropolitan area networks (MANs) in Albany, NY; Atlanta; Austin; Boston; Chicago; Cincinnati; Cleveland; Columbus; Dallas/Fort Worth; Dayton; Detroit; Houston; Indianapolis; Kansas City; Las Vegas; Los Angeles/Orange County; Miami; New York City/New Jersey/White Plains; Philadelphia; Pittsburgh; Sacramento; San Antonio; San Francisco; Seattle (IROOSA); South Bend; St. Louis; Tampa; Toledo; Tulsa; Washington, D.C. Local loop access to connect a customer premises to the Qwest network is handled under Qwest Local Access. Minimum one-year term of commitment required. Recurring and nonrecurring charges vary depending on term commitment, circuit and location.

Metro Private Line: Qwest® Metro Private Line is a stand-alone service available in SONET metropolitan area networks (MANs) in 27 United States metropolitan statistical areas (MSAs). Local loop access to connect a customer premises to the Qwest network is handled under Qwest Local Access. Minimum one-year term of commitment required. Recurring and nonrecurring charges vary depending on term commitment, circuit and city.

Notify: Notify voice, email, SMS or fax messages may be delivered from any domestic U.S. location to recipients within the North American Numbering Plan in the United States and Canada. Service may not be used for emergency notifications or for emergency services. A one year term of commitment is required. Other restrictions may apply.

Operator Services Domestic: Qwest® Domestic Operator Services is available throughout the United States and in Puerto Rico and U.S. Virgin Islands, and terminates either within the U.S. or internationally.

Operator Services International: International Qwest® Operator Services is available from many International originating countries and terminates either within the U.S. or internationally. The service is a Qwest Communications Company, LLC offering. Please contact the appropriate senior account executive on the contact link to get a full listing of International countries

Outbound Domestic Long Distance: Outbound Domestic Long Distance service is available and may be originated in the contiguous U.S. and Hawaii. Call origination service is unavailable in AK, except with worldcard® and toll free. Calls may be terminated throughout the United States and in certain U.S. territories.

Outbound International Long Distance – Qwest® Outbound International Long Distance (ILD) Service:

The Qwest Communications Company, LLC Outbound International Long Distance Service provides customers the capability to originate an international long-distance call from any U.S. state (Hawaii is available for switched origination only), with the exception of Alaska, to over 200 international destinations. Mobile terminations are available in a majority of the destinations (see pricing sheet for availability and pricing). Switched and dedicated international call origination are not available from Alaska and the U.S. territories.

Perimeter Check: Perimeter Check is a subscription-based vulnerability-assessment service designed to allow customers to simulate “attacks” on their network perimeter. Service is available domestically. Please call your sales representative for complete details. Customer is responsible for obtaining Internet connectivity in association with this service. Minimum term of commitment required. Additional equipment may be required. Set-up fee applies. Additional restrictions may apply.

Private Line Analog: Qwest Corporation Analog Private Line services are available on an intraLATA basis only in the Qwest local service territory in the states of AZ, CO, IA, ID, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY.

Private Line DDS: Qwest Corporation Private Line Digital Data Service (DDS) is available on an intraLATA basis only in the Qwest® local service territory of AZ, CO, IA, ID, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY. Required CPE may be obtained from Qwest or a third party at an additional charge

Private Line Domestic: Qwest Communications Company, LLC Domestic Private Line service is available to Qwest® business customers in the domestic U.S., subject to availability of facilities. SONET equipment or routers needed to terminate circuits. Installation, expedite, local access and extended wiring charges may apply.

Private Line DS-1: Qwest Corporation Private Line DS-1 Service is only available in Qwest’s local service territory in the states of AZ, CO, ID, IA, MN, MT, NE, NM, ND, OR, SD, UT, WA and WY. Minimum term of commit required. Termination charges apply.

Private Line DS-3: Qwest Corporation Private Line DS-3 Service is only available in Qwest’s local service territory in the states of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY. Minimum term of commitment required. Termination charges apply.

Private Line International: Qwest Communications Company, LLC Private Line for International service provides international connectivity between the United States and major cities in various countries around the world. Circuits bound for Asia are passed through Qwest's West Coast gateway for trans-Pacific transport with termination on the Qwest® AsiaLink network. Available AsiaLink network coverage includes Australia, Hong Kong, Singapore, and Tokyo. Qwest offers service to Europe and additional countries around the world through strategic relationships with third-party Global Service Providers.

Private Line Self-Healing Network Service (SHNS): Qwest Corporation Self-Healing Network Service (SHNS) is available in the Qwest local service territory of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA, and WY. Minimum one-year term of commitment and minimum of three nodes required. Early termination liability may apply.

Private Line SONET Ring Service (SRS): Qwest Corporation Private Line SONET Ring Service (SRS) is only available to existing customers in the domestic U.S. SONET gears or routers needed to terminate circuits. Installation, expedite, local access and extended wiring charges may apply.

Private Line Synchronous Service Transport (SST): Qwest Corporation Private Line Synchronous Service Transport (SST) is available on an intraLATA basis only in the Qwest® local service territory of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY.

Minimum one-year commitment required. Rates vary depending on speed and term commitment selected. Installation charge may apply. Additional equipment may be required. Additional restrictions may apply.

Qwest Metro Optical Ethernet: Qwest® Metro Optical Ethernet from Qwest Communications Company, LLC is available in selected areas. Rates vary depending on speed and term commitment selected. Installation charge may apply. Additional equipment may be required. Contact Qwest for availability and additional restrictions.

Qwest QC and QCC Metro Optical Ethernet: Qwest® Metro Optical Ethernet is available in selected areas. Additional equipment may be required. Contact Qwest for availability and additional restrictions.

Qwest Mobility: Qwest Mobility™ Service is available throughout the domestic United States, and dial-up, Wi-Fi, and hotel broadband access options are available in many, but not all locations both in and outside of the United States. Customers must verify with Qwest the availability of the Service in the customer's desired locations. Pricing may vary depending upon the type of access options used. Other restrictions may apply. See your Qwest representative for complete details.

Qwest Total Advantage: Customers in the United States may use the Qwest Total Advantage® agreement for a broad range of Qwest services, including, but not limited to: Asynchronous Transfer Mode (ATM), Private Line, Frame Relay, Dedicated Hosting Collocation, Qwest iQ® Networking, Qwest iQ® Managed VoIP, Qwest iQ® Analog and Digital VoIP, Toll Free, Long Distance Switched and Dedicated Voice, and Conferencing. Availability of these services varies by product.

Qwest Voice Advantage: Business customers in the United States may use Qwest Voice Advantage® for a broad range of Qwest® voice services, including Domestic and International Outbound Long Distance, Toll Free, Conferencing, Directory Assistance and worldcard®. Excluding worldcard and Toll Free, calls cannot originate in Alaska. Toll Free may originate in Alaska if the call terminates outside of Alaska. Call origination is also unavailable in Commonwealth of Northern Mariana Islands, Guam, Puerto Rico and U.S. Virgin Islands. Minimum term of commitment required; shortfall and termination liability applies. A PIC change charge will apply. Only base monthly recurring charges applicable to contributory services (specified in customer's agreement) contribute to total monthly spending levels used to calculate your rate for Long Distance service. Listed rates for plans do not include taxes, incremental charges and surcharges, as applicable. Instate, local toll, and international rates vary. Limitations exist for 1+ service, data applications, dialup data (modems) or fax traffic. Rates are subject to applicable tariffs, the Rates and Services Schedules and Interstate Inter-exchange and International Service Agreement. Service provided by Qwest Communications Company, LLC.

Security Services. Qwest's security services include Anti-Virus/Anti-Spam Service, Intrusion Detection Service, Managed Firewall-VPN Service, and Perimeter Check Service. Intrusion Detection Service and Perimeter Check Service are available in the domestic United States. Anti-Virus/Anti-Spam Service and Managed Firewall-VPN Service are available domestically and in many, but not all international locations. Customers must verify with Qwest the availability of service in the customer's desired locations. Depending on which services are used, term commitments may apply, setup fees may apply, additional equipment may be required, and/or a separate Internet connection may be required. Additional restrictions may apply. See your Qwest representative for complete details.

Telco Collocation: Non-regulated Telco Collocation is available to customers in Qwest® tenant improved (TI) points of presence (POPs), Qwest remote collocation sites, and collo-hotels with which Qwest has contracted. Availability is dependent on space and power availability at selected site. Access fee charged separately. Service bundled with Qwest transport or IP services. Minimum revenue commitments required.

Toll Free Domestic (QCC): Qwest U.S. Domestic Toll-Free service provided by Qwest Communications Company, LLC (QCC) is available for origination from anywhere in the United States, including Alaska and Hawaii, and some U.S. territories, with switched and dedicated termination anywhere in the contiguous U.S. and switched termination to Alaska, Hawaii, and some U.S. territories. Additional local loop equipment may be required for dedicated termination only.

Toll Free International Service /Universal International Freephone: Qwest® International Toll Free Service (ITFS) and Universal International Freephone Number (UIFN) service allow customers to originate toll free calls from an international destination, including Canada, and terminate to all contiguous U.S. states and Canada. Calls may not originate and terminate within the same country. Toll free calls may terminate in Alaska, Hawaii, and some U.S. territories, if special pricing approval is granted by Qwest. Termination is available in the U.S. for switched and dedicated services and in Canada for switched services only. Some countries, however, may not accept new orders and some may not accept portability orders. Please check availability in the ITFS/UIFN Availability Matrix.

Traffic Data Report Service (TDRS): Traffic Data Report Service (TDRS) periodic, printed summaries can only be provided for certain network facilities (hunt, trunk or queue groups) where traffic travels through equipped Qwest® central offices. Traffic carried on point-to-point circuits not available for reporting, but can provide studies on individual lines. Information provided depends on central office capabilities. Minimum term of commitment required.
